Paul Baker  
State of Utah  
Dept of Natural Resources  
Division of Oil, Gas and Mining  
RE: Letter of Deficiencies  
Dear Mr. Baker:

The articles of incorporation filed with Utah State Commerce has been updated to show that James Byars is listed as a director.

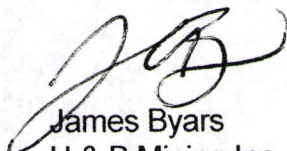

Attached you will find the operations map at a scale of 1"=200'.

For each ½ acre block that is mined I am estimating 500 cubic yards of topsoil will be stockpiled for reclamation, 500 cubic yards of Overburden will be stockpiled for reclamation, and 14,000 cubic yards of mineral will be extracted. Due to limited exploratory work allowed at the site these are rough estimates and I believe that time will tell actual volumes.

Our intentions are to begin fencing and topsoil removal immediately upon your approval.

Please send permit correspondence to the address below.

Sincerely,

James Byars
